

Carlos Fernando Aguilera
AI Manager

PROFILE

Technology leader with 15+ years of experience across cloud architecture, DevOps, platform engineering, application modernization, and enterprise delivery.
Strong background leading teams, defining technical standards, and driving automation across AWS, Azure, GCP, and IBM Cloud environments.
Hands-on profile that connects strategy and execution, with experience working alongside infrastructure, data, and AI stakeholders to support governance, reliability, and delivery.
Brings a management-first mindset without losing the technical depth needed to support delivery, governance, and operational execution, with emphasis on AI-enabled transformation and platform evolution.

KEY SKILLS

AI Strategy Automation Leadership Technical Governance Team Management	Cloud Architecture Multi-Cloud Strategy AWS / Azure / GCP Platform Engineering	DevOps and CI/CD Kubernetes Terraform / Ansible Observability

WORK EXPERIENCE

Company: AGLz AI Agency
Position: **Consultant** | AI Engineer | AI Specialist
Period: 12/2025 – Present

Main Achievements:

- Architected AI solutions using Azure OpenAI, Azure AI Foundry, Azure AI Search, and Semantic Kernel.

Function description:

- Implemented automations and multi-step workflows with n8n, Claude Code, Codex, and related tooling when a lighter integration path was appropriate.
- Built AI agents, copilots, and knowledge-grounded workflows with retrieval, tool calling, and orchestration patterns.

Software / Tools:

- Azure OpenAI, Azure AI Foundry, Azure AI Search, Semantic Kernel, Azure Functions, Logic Apps, Python, n8n, Claude Code, Codex, Git, Docker, GitHub Copilot, Power Automate.

Company: Yapoli
Position: **Consultant** | Senior Cloud Solution Architect
Period: 02/2024 – 03/2025

Main Achievements:

- Consulting engagement focused on cloud architecture, DevOps delivery, automation, and technical leadership.

Function description:

- Led cloud architecture and DevOps practices for client application environments.
- Supported pipeline design, environment readiness, and reliable release processes for Laravel and React applications.
- Acted as a technical lead for development teams and hands-on automation initiatives.

Software / Tools:

- Laravel, AWS, GSuite, VSCode, React, shell script, Docker, Kubernetes, Jira, Bitbucket, Lambda, DynamoDB, Route53, EC2.
-

Company: NTT Data

Position: Senior Cloud Solution Architect

Period: 04/2025 – 10/2025

Main Achievements:

- Worked as Cloud Specialist and Alliance Partner Advisor supporting infrastructure, data, and AI-related initiatives.

Function description:

- Partnered with Infrastructure, Data, and AI teams in business and technical meetings.
- Supported project planning, implementation discussions, infrastructure migrations, and data migration initiatives.

Software / Tools:

- Azure, GCP, AWS, Oracle, Office365.
-

Company: TCS

Position: Senior Cloud Solution Architect

Period: 01/2023 – 02/2024

Main Achievements:

- Worked as Solution Architect and DevOps Specialist on a large enterprise banking program.

Function description:

- Owned pipelines and deployment of Java applications across environments.
- Supported implementation of applications built with Java and Spring Boot.
- Defined and promoted CI/CD best practices using Atlassian and quality/security tooling.
- Contributed to KPI and OKR reporting for delivery transparency.
- Take care of reports with KPIs/OKRs.

Java, Azure, GCP, Office365, VSCode, NodeJS, shell script, Nexus, Docker, Kubernetes, Confluence, Jira, Bitbucket, Bamboo, Sonar, Fortify.

- Java, Azure, GCP, Office365, VSCode, NodeJS, shell script, Nexus, Docker, Kubernetes, Confluence, Jira, Bitbucket, Bamboo, Sonar, Fortify.

Company: Cognizant

Position: Senior IT Infrastructure Manager / Cloud Architect

Period: 06/2021 – 07/2022

Main Achievements:

- Led cloud architecture and infrastructure work with a strong GCP focus.

Function description:

- Created proof of concepts using Terraform, OpenShift, Tekton, and GKE.
- Led migration of 50 applications from Azure to GCP.
- Helped establish a GCP Center of Excellence and defined delivery standards.
- Supported Java and RabbitMQ application implementations and CI/CD practices.
- Prepared technical presentations for internal customers and stakeholders.
- Responsible for the patterns of GCP South America.
- Definition, creation and instruction on best practices on CI/CD belts with Cloud Build, Cloud Run and Tekton.
- Prepare and make technical presentations explaining products or services to staff and internal customers.

Java, Azure, GCP, AWS, ICP, OpenShift, Office365, VSCode, NodeJS, shell script, Jenkins, Ansible, Terraform, Travis, Nexus, Prometheus, ELK, Splunk, New Relic, Docker, Kubernetes, React, Angular, VueJS, Laravel, iOS, Android.

- Java, Azure, GCP, AWS, ICP, OpenShift, Office365, VSCode, NodeJS, shell script, Jenkins, Ansible, Terraform, Travis, Nexus, Prometheus, ELK, Splunk, New Relic, Docker, Kubernetes, React, Angular, VueJS, Laravel, iOS, Android.

Company: IBM

Position: Team Leader / Cloud Solution Architect

Period: 02/2019 – 04/2021

Main Achievements:

- Combined architecture leadership, team leadership, and project management responsibilities.
- Worked in definition of architecture for new resources and integration points.

Function description:

- Supported the Volkswagen project with Cognitive Manual and DDX implementations.
- Led two agile teams at GPA and helped adapt Cheftime to operational systems and controls.
- Contributed to Bradesco architecture and infrastructure work across multiple cloud platforms.

Java, Azure, GCP, AWS, ICP, OpenShift, Office365, VSCode, NodeJS, shell script, Jenkins, Ansible, Terraform, Travis, Nexus, Prometheus, ELK, Splunk, New Relic, Docker, Kubernetes, React, Angular, VueJS, Laravel, iOS, Android.

- Java, Azure, GCP, AWS, ICP, OpenShift, Office365, VSCode, NodeJS, shell script, Jenkins, Ansible, Terraform, Travis, Nexus, Prometheus, ELK, Splunk, New Relic, Docker, Kubernetes, React, Angular, VueJS, Laravel, iOS, Android.
-

Company: Leroy Merlin
Position: DevOps / Software Developer
Period: 09/2018 – 01/2019

Main Achievements:

- Helped create and mature the DevOps area and improve CI/CD practices.

Function description:

- Worked as a DevOps evangelist supporting operational modernization. Applied headquarters standards from France to local delivery and infrastructure practices. Contributed across networking, hosting, build, registry, storage, and Kubernetes services on GCP.
- VSCode, Java, NodeJS, GCP, shell script, Jenkins, Ansible, Terraform, Travis, Nexus, Prometheus, ELK, Splunk, New Relic, Docker, Kubernetes.

Company: PagSeguro / PagBank (UOL)
Position: Software Architect
Period: 03/2018 – 09/2018

Main Achievements:

- Worked as DevOps and architect across two agile teams.

Function description:

- Built AWS and GCP solutions supporting the PagBank transformation.
- Supported environment creation and collaboration with security and implementation teams.

Java, VSCode, NodeJS, AWS, GCP, shell script, Mesos, Kubernetes, Puppet, Chef, Ansible, Terraform, Git, Jenkins, Prometheus, Kibana, SaltStack, Nginx, Tomcat, MongoDB, Oracle.

- Java, VSCode, NodeJS, AWS, GCP, shell script, Mesos, Kubernetes, puppet, chef, Ansible, Terraform, git, Jenkins, Prometheus, Kibana, saltstack, New Relic, MongoDB, Oracle, Tomcat, nginx

Company: Netplus
Position: Team Lead / Software Developer
Period: 11/2016 – 03/2018

Main Achievements:

- Led and delivered web solutions for project control, finance, and customs workflow automation.

Function description:

- Built a project control web application with timesheets, budgets, deliverables, and people management.
- Built a financial control application on top of a legacy ASP system.
- Migrated part of the solutions to AWS while modernizing the delivery stack.

Visual Studio, .NET, C#, Laravel, VueJS, ASP, PHP, HTML, CSS, JavaScript, AWS, Locaweb, shell script, Puppet, Git, Jenkins, Zabbix.

- VisualStudio, NET, C#, Laravel, VueJS, ASP, PHP, HTML, CSS, JavaScript, AWS, Locaweb, shell script, puppet, git, Jenkins, Zabbix

Company: Eugênio & Damatto
Position: Senior Information Technology Business Consultant

Period: 11/2012 – 11/2016

Main Achievements:

- Delivered consulting and cloud architecture work for e-commerce and real estate solutions.

Function description:

- Built a real estate web application with cash flow monitoring, rent, sales, and realtor management. Migrated legacy PHP solutions to Laravel and VueJS while using AWS services for deployment and storage.
- VSCode, Laravel, VueJS, PHP, HTML, CSS, JavaScript, AWS, Locaweb, shell script, Git, Jenkins.
- VSCode, Laravel, VueJS, PHP, HTML, CSS, JavaScript, AWS, Locaweb, shell script, git, Jenkins.
-

Company: Doctor IT Tecnologia

Position: IT Project Manager

Period: 04/2011 – 01/2013

Main Achievements:

- Managed infrastructure and field service projects in enterprise environments.

Function description:

- Conducted site surveys and technical documentation for TV Cultura.
- Supported mini data center implementation for Hidroconsult.
- Managed field services and infrastructure operations across multiple clients.
- Implemented on-premises infrastructure with Windows AD, DNS, Exchange, SQL Server, and SharePoint.
- Managed firewall, identity, and server infrastructure for professional services clients.

Windows Server, Exchange Server, SharePoint, SQL Server, Oracle, AutoCAD, Project, Visio, PMO, ITIL, COBIT, Governance, Squid, Endian, SonicWall, Dell IPMI.

- Windows Server, Exchange Server, Sharepoint, SQL Server, Oracle, AutoCAD, Project, Visio, PMO, ITIL, COBIT, Governance, Squid, Endian, Sonicwall, Dell IPMI.
